Experiment – 3

Seat Booking Reservation System Using Zoho One (SaaS)

Aim

To create a Seat Booking Reservation System using Zoho One as a cloud-based Software as a Service (SaaS) application.

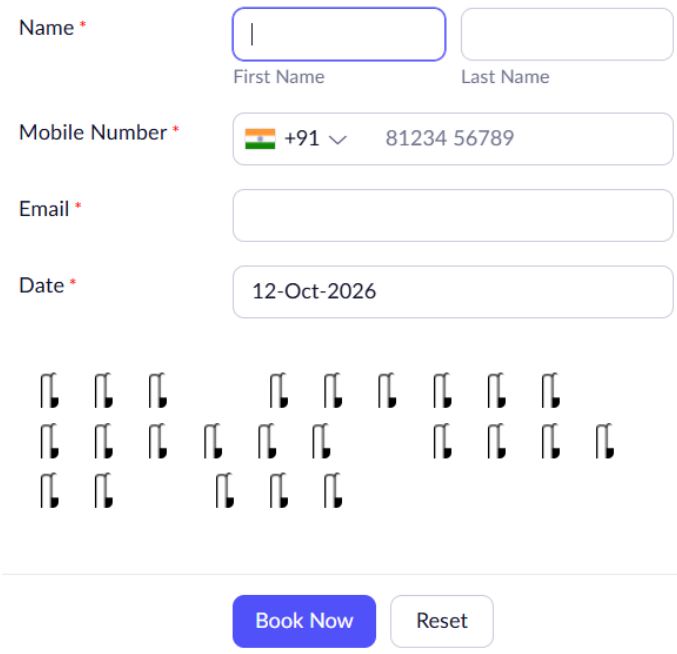

Procedure

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application for the Seat Booking Reservation System.
4. Create a new form named Seat Booking Reservation.
5. Add the required fields:
    - Customer Name
    - Email Address
    - Mobile Number
    - Booking Type
    - Journey Date
    - Source
    - Destination
    - Seat Number
    - Number of Seats
    - Payment Status
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.
8. Save and publish the form.
9. Enter sample seat booking details into the form.
10. Submit the form and verify that the entered data is stored in the cloud.

11. Test the application by entering different seat booking details.
12. Verify that the Seat Booking Reservation System works successfully as a SaaS application.

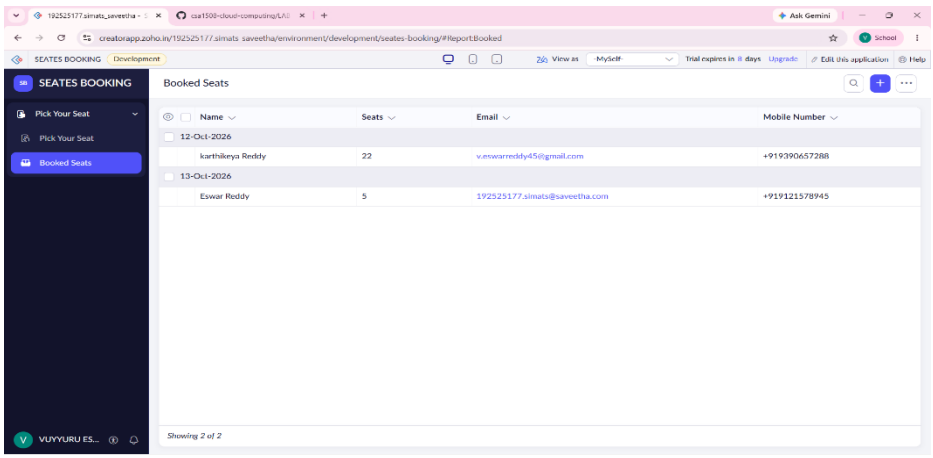

Implementation

Input:

Enter the required seat booking details in the Seat Booking Reservation form, including customer information, booking type, journey date, source, destination, seat number, and number of seats.

Output:

The submitted seat booking details are displayed in the Zoho Creator application. The stored booking records can be viewed and managed through the application.

Result

Thus, a Seat Booking Reservation System was successfully created using Zoho One and demonstrated as a Software as a Service (SaaS) application.
